

English

We will be looking closely at the traditional tale of Aladdin and then writing our own version. We will also be linking our Geography study of Rivers by analysing and performing 'The River' poem by Valerie Bloom.

Maths

In maths, we will be consolidating previous learning and using place value to order, compare, partition and round numbers. We will also be using the formal written method for +/- and using this to solve more complex problems.

Beech Class Curriculum Newsletter

Computing

We will learn about self-image and identity online and explain how an online identity can be different to an offline identity. We will also be creating and debugging code on Scratch.

Foundation Subjects

In History we will be learning about migration and identifying the push and pull factors that would make people want to migrate to Britain. Geography will see us identifying different rivers and understanding the different parts of a river.

A message from Mr Burgess and Mrs Thompson

Welcome to a new year in Beech class. Mrs T, and I are really looking forward to teaching old and new faces challenging the children and having fun along the way. We will really benefit this year from having a smaller class and being able to really understand how to get the best out of all of the children.

Science

In Science, we will be focusing on human nutrition and grouping living things. The children will describe the functions of the parts of the digestive system, identify different types of teeth and their functions and also use classification keys.

PE

Every Tuesday, I will be teaching the class P.E. We will be focusing on invasion games and developing the skills of passing, dribbling and shooting and applying tactics when attacking and defending.

Homework

The children will bring home a homework book every two weeks. There will be four tasks:

1. Maths/TT Rockstar
2. Reading
3. Spellings/Spelling Shed
4. A writing task
